1981 Galápagos Is. Dx-pedition

CONFIRMS QSO WITH RADIO <i>W9YT</i>		DATE <i>25</i> NOV DEC	
GMT <i>1557</i>	MHZ <i>50.1</i>	2-WAY CW <i>SSB</i>	RS-T <i>59</i>

STN: 160 M — 25w/Inv. Vee, HF — TS180s—SB220/FL2100B, 80/40 dipoles, portable monoband Yagis donated by Antenna Research Corporation (K7CA), VHF—9w/2 el. quad.

The Galápagos Islands have played and continue to play in the scientific world as a "Laboratory of Evolution", with an incredible array of plants and animals that occur nowhere else in the world. A total of 35,000 QSO's were made during my one month stay on Santa Cruz Island, 2,080 QSO's being on 6 Meters.

A donation of \$5.00 U.S. or equivalent in any foreign currency sent to my above adr will bring you postage—paid: one 5X7 inch PHOTO OF ACADEMY BAY where Charles Darwin landed with the H. M. S. Beagle in 1835, also a different 5X7 inch PHOTO OF THE UNIQUE WILDLIFE seen in the Islands. Contributions will go towards the purchase and installation of a permanent 6 METER GALAPAGOS BEACON.

TNX to HC1BI, HC1QRC, HC5CRC, HC5CN, HC5HC, HC8GI, Johnny Angermeyer, and my XYL — HC1MM - QRP's for making this DX—pedition a success. Foto by Tui De Roi.
